The Self-Assessment Tool for Conservation Trust Funds

The Self-Assessment Tool (the "Tool") is a starting point for Conservation Trust Funds (CTFs) to **evaluate their compliance with the 2020 Practice Standards** for CTFs of the Conservation Finance Alliance (Bath et al., 2020).

The Tool aims to **simplify the assessment process for CTFs** and produce accessible results with practical considerations for improvement after performing the assessment.

This manual provides simple **guidance on the usage of the Tool**.

When deciding to use the Tool, a CTF should also carefully **consider other aspects such as the goal, audience, methodology and resources available** for the assessment, among others.

Bath, P., Luján-Gallegos, V. and Guzmán-Valladares A. (2020), Practice Standards for Conservation Trust Funds Funds - 2020 edition, Conservation Finance Alliance, New York.
<https://www.conservationfinancealliance.org/s/Practice-Standards-For-Conservation-Trust-Funds-2020-EN-links-211208.pdf>

Who should participate in the self-assessment?

CTFs recommend that during a self-assessment, various team and/or Board members **jointly review the compliance with different standards** and reach an **agreement on a shared response**.

Some CTFs use a highly participatory approach by **engaging full staff teams** (by expertise) to do the assessment, in part to ensure that they all know about- and utilize the Practice Standards.

Another alternative is that **different knowledgeable individuals** (e.g. Board, staff and even external parties) can be asked to complete the assessment for the full set of standards or by core area. Then a coordinator, or coordinating team, consolidates the results of the assessments, and clarifies possible doubts.

The methodology chosen by each CTF will depend on their **stage of evolution, capacity and experience**. A good practice is to **choose one methodology** and use it consistently over the years to have comparable data.

The Spreadsheets

To ensure **wide accessibility**, the Tool is built in Microsoft Excel using simple functionalities¹.

You can complete the full assessment by going through the following four **spreadsheets**.

1. Introduction

2. Assessment

3. Results Overview

4. Practical considerations

This manual provides general guidance on the steps to follow when using the Tool, but more specific instructions can be found within each spreadsheet.

¹ The Tool was built on Microsoft Excel version v2302 for Windows OS. It should be noted that using older or different software versions can result in visual variations and, potentially, its functionality. To minimize the risk of the latter, the correct functioning of the Tool was tested by multiple CTF representatives in their respective Operating Systems and available software.

Spreadsheet 1. Introduction

The **Introduction Spreadsheet** guides you through the structure and use of the Tool, including brief explanations of each spreadsheet.

Self-Assessment Tool for Conservation Trust Funds

Updated version March 2023

Introduction

This Self-Assessment Tool is presented as a starting point to assist Conservation Trust Funds (CTFs) in the evaluation of their compliance with the 2020 Practice Standards for CTFs of the Conservation Finance Alliance.

The goal of this tool is to simplify the assessment process for CTFs and produce easily accessible results with practical considerations for improvement after the assessment.

When deciding to use this tool, a CTF should carefully consider the goal, audience, methodology, resources available, and other relevant criteria for the CTF.

Given that some of the contents in the tool correspond to summarized excerpts from the 2020 Practice Standards for CTFs, the CTF managers, staff or third party using the tool are recommended to refine their assessment and the interpretation of its results by consulting additional details in the full descriptions of the standards.

Structure and use of the tool

The tool is organized into 4 different spreadsheets:

1. **Introduction (current spreadsheet)** is the page where all the information about the tool, its purpose and how to use it is compiled.
2. **Assessment** is where the CTF managers, staff or third party perform the self-assessment. This includes the following steps:

Step 1: Selecting the relevant standards for the assessment. The different options in the drop-down menu are:

Spreadsheet 2. Assessment

Step 1. Selecting relevant Practice Standards for the assessment

The first step in this spreadsheet is to **select the relevant Practice Standards** for the assessment. You can do this by clicking on the *Select here* cell, which will display a drop down menu to select either:

- A given set of standards that are relevant for a specific stage of evolution (i.e., **Pre-registration, Start up, Operational, Institutional** or **Termination**) based on Bath et al. (2020);
- **All Standards;** or
- A **Customized Selection** of standards.

Step 1. Select relevant practice standards for the assessment

Select an option from the drop-down menu to enable the assessment of the relevant standards for your institution.

When choosing the *Customized selection* option, you can choose the standards that you would like to assess by checking the relevant boxes in the column *Optional customized selection*.

Governance	
	Optional customized selection
1	<input type="checkbox"/> 1
2	<input type="checkbox"/> 2
3	<input type="checkbox"/> 3

governing documents clearly define the purposes for which Conservation Trust Fund's or a Program Account's assets may be used.

governing documents clearly define the composition, powers and responsibilities of the governing body (or bodies). A governing body's composition is designed so that its members will have a high level of independence and stakeholder representation.

governing body members are selected or appointed based on their competencies and commitment to contribute to the organization's mission.

Spreadsheet 2. Assessment

Step 2. Performing the assessment

Assessment

Step 2. Perform the Assessment

If relevant, select additional standards for the assessment by checking the boxes in the "Customized selection" column. To perform the assessment, use the drop-down menu of the cells from "Score" column (right side of the table) to assign a score on the degree of implementation of each relevant standard.

These checkboxes are automatically selected according to the selected stage of evolution.	Optional customized selection	Governance	Evidenced by:	Score ⓘ	Comments:
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Governing documents clearly define the purposes for which a Conservation Trust Fund's or a Program Account's assets may be used.	Governing documents	←

A governing body's composition is designed so that its members will have a high level of independence and stakeholder representation.	Governing documents CVs of governing body members	←	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Governing body members are selected or appointed based on their competence and committed to contribute meaningfully to the CTF or Program Account's overall mission and responsibilities.	Governing documents CVs of governing body members	←	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Specialized committees are established by governing bodies to provide advice and to perform certain functions of the CTF or Program Account more effectively and efficiently.	Governing documents Committee terms of reference Minutes of committee meetings Minutes of governing body meetings List of committee meetings	←	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	A governing body has at least three meetings per year and maintains accurate written records of all meetings and decisions.	Governing documents Governing body meetings minutes and resolutions	←	

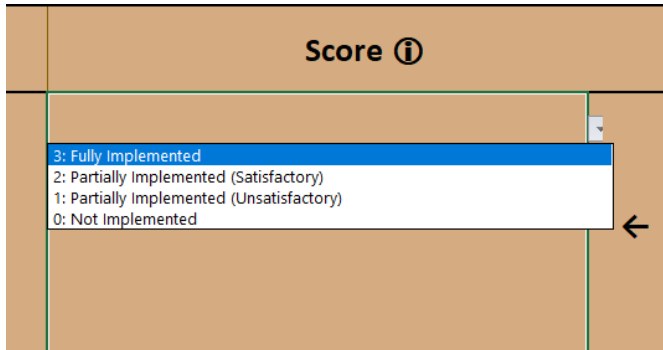

Once you have selected an option from the drop-down menu, the **applicable standards will be displayed** in colour and can be evaluated in the **score cells**.

Standards that remain grey do not apply for that selected option. However, you can **manually add them** by checking the *Optional customized selection* checkbox.

Spreadsheet 2. Assessment

Step 2. Performing the assessment

When performing the assessment, clicking on the *Score* cell will **activate another drop-down** menu with **4 scoring options** to indicate the level of compliance of the CTF with each Practice Standard.

Descriptions of each score are provided in the **Introduction Spreadsheet** as well as a pop-up comment in the *Score* cell itself.

Note: The distinction between *Satisfactory* and *Unsatisfactory* progress has been introduced as a **subjective element** that allows a CTF to qualify its progress towards compliance based on **internally defined targets and expectations** when a standard has been *Partially Implemented*. Therefore, it is important that the CTF managers, staff or third parties using the tool **make a conscious decision on how to assign** this subjective element of the assessment.

Spreadsheet 2. Assessment

Step 2. Performing the assessment

Since multiple and/or recurring assessments could be conducted by different teams or individuals over time, it is important to **keep track of the rationale** that they have used when assessing each standard by providing relevant details about this in the column for *Comments*.

The column for *Comments* can also be used to record the titles and locations of the documents that were used as **evidence** and key supplementary information, such as the status of such documentation (e.g. draft, final version, expired, etc.)

By adding the relevant details to this column, a CTF can promote **continuity, comparability** and **coherence** among multiple assessments. This can be particularly important when a standard is assessed as *Partially implemented*, given the subjective considerations that the use of this category can entail.

Score ⓘ		Comments:
1: Partially implemented (Unsatisfactory)	←	

Spreadsheet 2. Assessment

Step 2. Performing the assessment

While conducting the assessment, you can use the **buttons** at the top of the page to move across the **different core areas of the Practice Standard and Spreadsheets of the Tool.**

Once you reached the end of the **Assessment Spreadsheet** and have completed all the core area assessments that apply to your selection, you are ready to go to the **Results Overview Spreadsheet.**

Assessment		Governance	Institutional Effectiveness	Programs	Administration	Asset Management	Resource Mobilization	Risk Management	Introduction	Results Overview	Practical Considerations
		Risk Management						Evidenced by:		Score	Comments
SP1	1	Optional customized selection						CTFs develop risk management policies and procedures to reliably achieve their objectives, manage uncertainty, address grievances and act with integrity. SP5	5							CTFs set clear roles and accountability for risk oversight and safeguard implementation.	Chief executive job description Governing body description Operations manual(s) (and/or human resources manual)	1: Partially Implemented (Unsatisfactory)	←
SP6	6							CTFs set policies to protect the safety and well-being of staff members and provide safe working conditions.	Human resources manual Risk management procedures Map indicating risk levels in CTF program geographies. Life and health insurance policies for staff.	3: Fully Implemented	←
SP7	7							CTFs have a policy to protect whistleblowers.	Operations manual(s) Whistleblowing policy Anonymous suggestions box	3: Fully Implemented	←

Spreadsheet 3. Results Overview

The **Results Overview Spreadsheet** has 2 parts: **The first part** is this table where you can graphically **see the results of the assessment**, you can use the colour key at the top right of the page, to match each colour with its score. If there is a white cell, this means you have not assigned a score for it.

Results Overview

Top of the page	Introduction	Assessment	Practical Considerations

Finally, in the **Practical Considerations Spreadsheet**, it is important to **refresh the filter** in the score column every time you make changes in the assessment for it to show the relevant practical considerations for the standards with the lowest scores.

This spreadsheet includes *Practical Considerations* that are **extracted from the Practice Standards 2020** edition. The CTF managers, staff or third party using the Tool are also recommended to refine their assessment and the interpretation of its results by **consulting additional details in the full descriptions of the standards**.

The spreadsheet also includes a column with *External Resources* that contain **some links to the CFA Environmental Funds Toolkit**. It is important to note that this website is a living page and that relevant resources might not be available at all times.

The Updated Version of the Self-Assessment Tool for Conservation Trust Funds was made possible through the financial support of the Bridge Project and the coordination by Asociación Costa Rica por Siempre. Leonardo García and Andrea Sécola (Asociación Costa Rica por Siempre), Katy Mathias (WCS), David Meyers (CFA) and Stain Katuli (CAFÉ), who offered guidance and detailed input throughout the project.

The Following Conservation Trust Funds tested the draft version of the Tool and provided valuable feedback to improve it: MAR Fund, Caribbean Biodiversity Fund, Mulanje Mountain Conservation Trust Fund, Micronesia Conservation Trust Fund, Madagascar Protected Areas and Biodiversity Fund, and Fondo Mexicano para la Conservación de la Naturaleza.

For further inquiries about the Tool feel free to contact us at:
